JAYPRO MODEL PVBN-1

HIGH SCHOOL COMPETITION VOLLEYBALL NET

Net shall be 32' long x 36" high with a 2" white polyester reinforced vinyl top binding which surrounds the perimeter of the net body. Top cable shall be manufactured from 1/8" x 7 x 19 vinyl coated to 3/16" A/C cable x 33' 10". Cable is looped at each end for leader strap attachment. This net is designed to be used on most Jaypro volleyball units. Net shall meet the requirements set forth by the National Federation of State High School Associations.

Netting shall be manufactured from high quality, #21 black thread knotted nylon 4" square mesh. Two 3/8" round steel net dowels slip into the sides of the net body to resist net sag.

Each end of net body shall have two quick-locking snap buckles sewn to 1" white nylon web straps for quick and easy net attachment. Bottom of net shall have one 1/4" x 38' nylon cord, with net tension handle to adjust lower net tension.
