

PRODUCT

DESCRIPTION

VEX U Robotics Cabinet

Robotic team storage solution for robots and supplies. The maple plywood workbench has two compartments. The pull-out shelf on the two compartment unit holds up to a 24" square robot. Also, within the compartment is a separate drawer with a customizable foam insert (included) to store tools (not included). Each compartment is outfitted to accept a combination lock. The top is ShopTop®, which sandwiches a medium-density fiberboard between two layers of 1/2" high-density particleboard, creating a non-conductive and splinter proof top. The 1-1/4" ShopTop® can be extended an extra 8" by raising it. Lowering the extension allows the unit to fit through doorways and moves easily on six 4" heavy-duty, locking casters.
